PROFESSIONAL SUMMARY

Backend Developer with hands-on experience building RESTful and GraphQL APIs using Node.js, TypeScript, Express.js, and NestJS. Skilled in MongoDB and Mongoose, JWT authentication, Two-Factor Verification, Redis caching, and role-based access control. Completed the Route Academy Backend Node.js course as a Top Achiever, with practical experience across four backend and full-stack projects. Seeking a junior or internship Backend Developer role to contribute to scalable, well-structured backend systems.

PROFESSIONAL EXPERIENCE

Instructor – Afaq Academy for Artificial Intelligence

Aug 2026 – Present

- Deliver beginner-friendly lessons on artificial intelligence concepts and tools.
- Prepare structured educational content and simplify technical topics for learners.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Backend: Node.js, Express.js, NestJS, RESTful APIs, GraphQL, MVC Architecture, OOP, Repository Pattern, Modular Architecture

Databases: MongoDB, Mongoose (ODM), SQL Server, Database Design (ERD)

Authentication & Security: JWT, Two-Factor Verification (2FA), Role-Based Access Control (RBAC), Guards & Decorators, DTO Validation (class-validator)

Tools & Cloud: Git, GitHub, Postman, Redis, AWS, Cloudinary

Also: ASP.NET Web Forms, HTML, CSS

PROJECTS

E-Commerce Backend – Product Management System

NestJS · TypeScript · MongoDB · Cloudinary · JWT

- Built RESTful CRUD APIs for product management with image upload through Cloudinary.
- Implemented role-based authentication and authorization (Admin/User) using Guards and Decorators.
- Validated requests with DTOs and class-validator; structured the app with NestJS modules, services, and controllers.

Social Media Backend

Node.js · TypeScript · MongoDB · GraphQL

- Developed a GraphQL API with a custom repository pattern for a Facebook-like social platform.
- Built a reactions system and a Story module with TTL-based expiry indexing for automatic content removal.
- Created nested comment CRUD with soft/hard delete flows and cascading deletion hooks.

Wshwshny – Anonymous Messaging Backend

Node.js · MongoDB · Redis · AWS

- Engineered JWT authentication with Two-Factor Verification (2FA) for secure user access.
- Integrated Redis caching to improve API performance and modeled data with MongoDB and Mongoose.
- Deployed the backend to AWS.

Black Horse Car Garage – Graduation Project

ASP.NET Web Forms · SQL Server

- Built a car maintenance center management system and designed its database with ERD modeling in SQL Server.
- Developed the front end with HTML, CSS, and JavaScript alongside ASP.NET Web Forms.

EDUCATION

Bachelor's Degree in Business Information Systems

2026

El Motatawera Higher Institute, Haram – Giza

COURSES & TRAINING

Backend Development with Node.js – Route Academy

2025 – 2026

Top Achiever / 6-month course

- Covered security (hashing, Helmet, CORS, CSRF, rate limiting), SQL with ORM, Socket.IO, OAuth social login, Nodemailer, cron jobs, and Docker.

Programming Fundamentals – Route Academy

2025

Keys to Dealing with Artificial Intelligence – Ghareeb Elshaikh

Online course

LANGUAGES

Arabic (Native) | English (Elementary)
